

Employee workshop sponsor

1. Preparation

💡 This is a suggestion, **not a must**.

- Create a solution with the name of **FinalLab**.
 - Create a project with the name of **EmployeeWorkshopSponsor**

2. Scenario

Company B has a policy of supporting employee development by providing financial assistance for attending workshops. Employees will submit proposals for the workshop they wish to participate, including the workshop name and expense.

- Sponsorship eligibility considers factors including the employee's years of experience

Years of work	Classification	Percent of sponsoring
< 1 year	Fresher	50%
$1 \leq \text{year} < 2$	Junior	75%
$2 \leq \text{year}$	Senior	100%

- Work experience is calculated solely based on start month and year.
- Example:
 - Employee A has a start date of 01/05/2023. So his start month will be **05**/2023.
 - If today falls in **04**/2024 (any day in April), is counted as < 1 year of work
 - If today falls in **05**/2024 (any day in May), it is counted as a full 1 year of work (=1)
 - If today falls in **06**/2024 (any day in June), it is counted as > 1 year of work

Considering the policy has undergone two revisions in the past, your code should be designed to accommodate [future policy changes](#)

3. Requirements

1. Read all the proposals from the input file **May2024Proposals.txt** (only the information that you need)
2. Generate a table summarizing the results of all proposals.
3. Display the total amount of sponsorship funds allocated for this month.

4. Sample input

```
Employee: Name=Do Minh Long, Email=dmlong@gmail.com, StartDate=05/07/2023 =>
Workshop: Name=Mobile summit 2024, Expense=$60.69 Employee: Name=Tran Bao
Tuan, Email=tbtuan@gmail.com, StartDate=12/06/2022 => Workshop:
Name=Mastering node.js, Expense=$55.17 Employee: Name=Cao Hoang Thien,
Email=chthien@gmail.com, StartDate=12/06/2021 => Workshop: Name=Fast token on
your blockchain, Expense=$58.29
```

5. Sample output

 Please note: This data is for presentation purposes only and does not reflect actual results

```
Chuong trinh tai tro workshop cho nhan vien 05/2024 Dang doc cac de nghi tu
tap tin May2024Proposals.txt Tim thay 3 de nghi ho tro chi phi tham gia
workshop STT | Nhan vien | Tham nien | Ten workshop | Chi phi | Ho tro |
Thanh tien -----
----- 1 | Do Minh Long | Fresher | Mobile summit
2024 | $77.12 | 50% | $21.42 2 | Tran Bao Tuan | Junior | Mastering node.js |
$51.62 | 75% | $25.55 3 | Cao Hoang Thien | Senior | Fast token on your
blockchain | $66.33 | 100 | $66.33 Tong tien tai tro: $200.58
```

6. Submission instructions

- Delete the hidden **.vs** folder and all **Debug** folder

- Compress all your source code into a file with the format of **{StudentID}.zip** or .rar then submit back this file
 - For example, if your StudentID is 2216378 then your file name should be 2216378.zip or 2216378.rar
